Help America Hear is a registered 501c3 not for Profit Corporation. Our mission is to enhance the quality of life for men, women and children with vision and/or hearing challenges.

Funds are raised through a variety of special events, general donations from the private and corporate sector, grants, bequests and the generosity of many volunteers who give their valuable time. Monies are channeled to our two signature programs Help America Hear and our three Scholarships.

We are dedicated to creating a world where people with vision and/ or hearing challenges can realize their full potential, allowing them to lead lives of inclusion and not isolation. The Foundation feels we can provide opportunities for our constituents to be active participants in society through innovative programs.

It's all about possibilities and potential! Foundation For Sight and Sound is proud to offer the Help America Hear Program which

provides NEW high quality hearing aids Nationwide to men, women, and children with limited financial resources.

Please utilize the Help America Hear program as a LAST RESORT. As a prerequisite, we ask all applicants to exhaust all other financial resources including but not limited to, available credit, family support, money market accounts, mutual funds, 401(k) plans, trust funds, annuities, and savings/checking and State sponsored programs.

Help America Hear is made possible by the generosity of hearing health care professionals and manufacturers who donate their time and services. The program is also sponsored by our many corporate and private donors. We trust you will respect the integrity of the program and deeply appreciate the kindness of everyone involved.

## John Russell Thomas

Born at just 25 weeks, John and his twin sister Grace came in to our world three and a half months early. John was unresponsive and had to be revived, starting life in critical condition. He and his sister overcame hurdle after hurdle during their first six months in the hospital. They both proved to be fighters and eventually came home to their family. One hurdle that John couldn't overcome was his profound loss of hearing, initial tests showed a flat line response between his ears and brain. John was deaf.

After months of praying and banging pots near him, hoping that something would change... John suddenly began to respond to loud sounds. He was diagnosed with auditory neuropathy and moderate hearing loss. He eventually outgrew his auditory neuropathy, but he needed hearing aids and help to hear like other kids his age. He began to adapt and adjust, learning how to rely on little hearing aids to ensure he didn't miss the world

going on around him.

Now at twelve years old, John is a kind hearted, thriving boy. He has achieved the Principal's Honor Roll, become 6th Grade Class President of his middle school and enjoys competing in baseball, swimming, flag football, video games and all of the things any kid his age can. John knows the value of good hearing. The Foundation for Sight and Sound introduced John's family to better medical care and top of the line hearing aids. John is now honored to help others live a better life with the gift of hearing. John would like our help to ensure that no child or adult misses out on the world around them.

# The JOHN THOMAS Golf Classic
